CAUTIONS AND HINTS BEFORE USING

1. This product must be used with an AC outlet, with the proper voltage.
2. Be sure to plug the AC cord when the pan is not inserted, or the cooker is not in use. Remember, the "keep warm function" is operating whenever the AC cord is plugged in.
3. When the switch button cannot be depressed to the cook position, never try to force it down. Usually, when the pan is not inserted or when cooking has just finished, this condition will occur.
4. Always close the lid completely (after each serving) to prevent dryness, discoloration or unpleasant odors of the cooked rice.
5. Never keep the rice scoop or any other utensil in the pan when using the "keep warm" function.
6. Do not use the "keep warm" feature to reheat previously cooked rice that has been cooled.
7. Keep the surface between the bottom of the pan and the Pipe heater free from any foreign objects to avoid "keep cooker malfunction.
8. Warning - Do not remove the lid while the water is boiling.
9. The appliance must not be immersed in water for cleaning.
10. The pressure regulator allowing the escape of steam should be checked regularly to ensure that they are not blocked.

使用前注意事项
1. 本产品仅适用于AC电源插座。
2. 本产品内设温度控制器，请勿将其放在温度调节器或电源插座附近。
3. 严禁在非指定电器中使用本产品，以免发生意外。
4. 请勿用刀具、金属器具等工具直接插入米锅中。
5. 上盖请紧闭，不要将杂物放入米锅内。
6. 请勿用蒸汽或热水清洗米锅。
7. 请勿将米锅的内胆放入冰箱内冷冻。
8. 请勿用蒸汽或热水清洗米锅。
9. 请勿将米锅的内胆放入冰箱内冷冻。
10. 使用前请仔细检查米锅的内胆和盖子等部位，以确保其正常。

PTFE-coated pan
(Hint to ensure against damage to the PTFE-coating)
- When using the pan, be sure to use the detachable side-scrapers.
- Do not use a metal spoon, spatula or other utensil to stir or stir the PTFE-coated surface.
- Do not wash the pan with abrasive or harsh cleaners. Use a sponge or soft brush.
- If the pan's surface is damaged by scratching, it may cause the PTFE coating to peel off, which may lead to rusting or other problems.
- Once the pan's surface is damaged, it should be replaced immediately.
- Please handle the pan with care to avoid any damage to the PTFE-coating.

IMPORTANT SAFEGUARDS
When using electrical appliances, basic safety precautions should always be followed including the following:

1. Read all instructions.
2. Do not touch hot surfaces. Use handles or knobs.
3. To protect against electrical shock, do not immerse cord and Rice Cooker in water or other liquid, except inner lid and pan.
4. Close supervision is necessary when any appliance is used by or near children.
5. Unplug from outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts.
6. Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions, or has been damaged in any manner. Return appliance to the nearest authorized service facility for examination, repair, or adjustment.
7. The use of accessory attachments not recommended by the appliance manufacturer may cause hazards.
8. Do not use outdoors.
9. Do not let cord hang over edge of table or counter, or touch hot surfaces.
10. Do not place on or near a hot gas or electric burner, or in a heated oven.
11. Extreme caution must be used when moving an appliance containing hot oil or other hot liquids.
12. Always attach plug to appliance first, then plug cord into the wall outlet. To disconnect, turn any control to "off", then remove plug from wall outlet.
13. Do not use appliance for other than intended use.
14. After completion of rice cooking, do not start again rice cooking while the outer body still keep hot, it may cause malfunction.

SAVE THESE INSTRUCTIONS
Servicing should be performed by an authorized service representative.

A short power supply cord is provided to reduce the risk resulting from becoming entangled in or tripping over a longer cord. Longer detachable power supply cords or extension cords are available and may be used if care is exercised in their use. If longer detachable power supply cords or extension cords are to be used: (1) the marked electrical rating of the cords set or extension cord should be at least as great as the electrical rating of the appliance; (2) if the appliance is of the grounded type, the extension should be a grounding-type 3-wire cord; and (3) a long cord should be arranged so that it will not drape over the counter top or table top where it can be pulled down by children or tripped over unintentionally.

The following instructions shall be applicable only for 120V:

This appliance must be used only for cooking rice and keeping cooked rice warm.
**HOW TO USE**

1. Measure the desired amount of rice with the enclosed "measuring cup" supplied with this rice cooker. One cup of uncooked rice will be equal to about 3 cups of cooked rice.

2. Rinse the rice in a separate bowl several times until the rinse water becomes clear.
   **Note:** Rice suppliers advise not to rinse the rice too thoroughly before cooking. Vitamin loss may be less in this process.

3. Lay the cooking sheet on the bottom of the inner pan. Position the steam vent up.
   - In the position, there may be a "steam" drop. If there is a "steam" drop on the cooking sheet, it is the cause of unevenly cooked rice.
   - Also, the unlined section may cause "sticky-rice.

4. Add the desired amount of rice and water into the pan. (For example, 1 cup of rice added into the pan, water should be added until the water line reaches approximately the number "1 cup" of the scale illustrated on the inside of the pan.)

   **Helpful Hint:** An important point to remember is the "Scale" illustrated on the inside of the pan. An important illustration to follow. The amount of water depends on personal preference. More water makes fluffier rice. Less water makes firmer rice.

5. Place the pan into the cooker. Be sure the pan is in direct contact with the sensor. This is done by turning the pan from left to right until it is properly situated.

6. Place the inner lid to the outer lid by pressing the inner lid to cover over the inner lid shaft.
   - Turn the lid handle so that it faces the front on the lid shaft.
水滴收集器之拆卸方法

After each use of the rice cooker, the dew collector should be removed, emptied and washed thoroughly.

To remove:

Grap the dew collector and pull it toward the arrow direction.

清洁方法

Clean the outside of the cooler with a damp cloth.

Never submerge any part of the cooler other than the pan, inner lid, dew collector or any accessory in water or any other liquid.

Before using, wash with warm water and dry thoroughly.

Never use abrasive or harsh cleaners in cleaning.
